2008 SPA Program at a Glance

Wednesday, March 26, 2008

8:00 am – 4:00 pm  \hspace{1cm} Workshops #1 - #4  
(see description p. 7-10)

8:00 am – 11:30 am  \hspace{1cm} Workshop #5  
(see description p.11)

11:30 am – 1:00 pm  \hspace{1cm} Lunch Break

1:00 pm – 4:30 pm  \hspace{1cm} Workshop #6  
(see description p.11)

4:30 pm – 9:00 pm  \hspace{1cm} Board of Trustees Meeting

Thursday, March 27, 2008

8:00 am – 12:30 am  \hspace{1cm} Workshops #8 - 12  
(see description p. 13-16)

8:00 am – 12:00 noon  \hspace{1cm} Board of Trustees Meeting

11:30 am – 1:00 pm  \hspace{1cm} Lunch Break

1:00 pm – 2:00 pm  \hspace{1cm} Consultation Sessions:  
- Writing Cases for JPA  
- Research Consultation  
- Open Consultation Sessions (2)  
- ABAP Preparation

2:00 pm – 3:00 pm  \hspace{1cm} Opening Plenary Session  
Presidential Address Virginia M. Brabender

3:00 pm – 4:00 pm  \hspace{1cm} Bruno Klopfer Award Leonard Handler

4:15 pm – 5:15 pm  \hspace{1cm} Master Lecture I Robert F. Bornstein

6:00 pm – 7:00 pm  \hspace{1cm} Book Signing

6:00 pm – 7:00 pm  \hspace{1cm} President’s Welcome Reception

6:00 pm – 7:00 pm  \hspace{1cm} Poster Session I
Friday, March 28, 2008

7:30 am – 8:30 am Journal Editorial Board Meeting

8:30 am – 10:30 am Scientific Sessions
   Symp A: Research to Enhance Rorschach
   Case Disc B: Sexual Harassment Case
   Paper Session C: Expanding Scope of PA
   Paper session D: Assessment for Treatment Planning and Outcomes
   Paper Session E: Rorschach

10:45 am – 11:45 am Master Lecture II Gary Groth-Marnat

11:45 am – 1:15 pm SPAGS Board Meeting

12:00 – 1:15 pm Hertz Memorial Lunch
   In memory of Jerry S. Wiggins

12:00 – 1:15 pm Lunchtime Presentation:
   Thinking Through Self-Report Profiles to Generate Hypotheses & Conceptualizations

12:00 – 1:15 pm Case Disc F: Sexual Offenders

1:15 – 3:15 pm Scientific Sessions
   Symp G: JPA Supplement/International Reference Samples for Rorschach CS
   Symp H: Violence Risk Assessment
   Symp I: Conceptual Innovations in PA
   Paper Session J: Clinical Assessment Children and Adolescents
   Paper Session K: Assessment in Employment Screening and Counseling

3:30 pm – 5:30 pm Scientific Sessions
   Symp L: Assessing Perceptual Accuracy on The Rorschach
   Symp M: Clinical and Research in Collaborative Neuropsychology
   Integ Paper Session N: Play Assessment and Positive Psychology
   Symp O: Developing a Test for the 21st Century: Emotional Attachment System
   Paper Session P: MMPI-2/RC-RF Research

6:00 pm – 7:30 pm Reception/Award Ceremonies
   Walter G. Klopfer Award
   Martin Mayman award
   Beck Award Leonard J. Simms
   Mary Cerney Award Gudrun Opitz

7:00 – 9:00 pm Student/Post-Doc Workshop
   Donald J. Viglione
Saturday, March 29, 2008

7:30 am – 8:00 am  Exchange Editorial Board Meeting

8:00 am – 10:00 am  Scientific Sessions
   Symp A: Telling the Story of a Collaborative Personality Assessment Case
   Symp B: Disorganized Attachment and Custody
   Symp C: Psychoanalytic Theory and the Rorschach Method
   Paper Session D: Perceptual and Cognitive Aspects of the Rorschach Task
   Paper Session E: Assessment of Youthful Offenders

10:15 am – 12:15 pm  Scientific Sessions
   Roundtable E: Custody and Threats to Testing
   Symp G: The Wartegg Test
   Case Disc H: Police Psychology
   Symp I: Jerry S. Wiggins’ Legacy
   Paper Session J: PA in Health and Medical Settings

12:15 pm – 1:30 pm  Lunch Break

12:15 pm – 1:30 pm  Student Lunch John H. Porcerelli

12:15 pm – 1:30 pm  Interest Groups
   School Psychology  Health Psychology
   Neuropsychology  Forensic Psychology
   Collaborative/Therapeutic Assessment

12:15 pm – 1:30 pm  International Members Meeting

1:30 pm – 3:30 pm  Scientific Sessions
   Case Disc K: Case Study w/Int’l Norms
   Roundtable L: Teaching Assessment
   Paper Session M: Current Research on Self-Report Measures
   Paper Session N: Interpersonal Schemas and Internalized Representations
   Paper Session O: Forensic Assessment

3:45 pm – 5:45 pm  Scientific Sessions
   Symp P: Integrating Attachment in Adolescent Assessment & Clinical Cases
   Symp Q: Cognitive and Affective Constructions of Treatment Resistant Patients
   Paper Session R: Collaborative Assessment
   Paper Session S: Studying Abnormal states with the Rorschach
   Paper Session T: Assessing Suicide Risk
6:00 pm – 7:00 pm  
Farewell Reception for Journal Reviewers

6:00 pm – 7:00 pm  
Poster Session II

7:00 pm – 8:00 pm  
SPAGS General Meeting

Sunday, March 30, 2008

SPA Annual Meeting  
March 4-8, 2009  
The Westin on Michigan Avenue  
Chicago, IL

---

SPA Annual Meeting  
March 24-28, 2010  
The Fairmont Hotel  
San Jose, CA
**2008 Workshop Schedule**

**Continuing Education Credit**
As part of its SPA Annual Meeting program, the Society for Personality Assessment will present 7 full-day and 10 half-day workshops. SPA is approved by the American Psychological Association to sponsor continuing education for psychologists, and SPA maintains responsibility for this program and its content. The full-day workshops will offer 7 CE credits and the half-day workshops will offer 3.5 credits. CE credits will also be available, at no extra charge, for the two Master Lectures (1 CE credit each), the Bruno Klopfer Award presentation (1 CE credit), a special lunch presentation (1 CE Credit), the Hertz Memorial Lunch (1 CE credit), and for 20 symposia, roundtables, and/or case discussions (1 to 2 CE credits each).

**Workshops**
Workshops will be held on Wednesday, March 26, Thursday, March 27, and Sunday, March 30, 2008. No workshops are held on Friday, March 28, or Saturday, March 29, 2008. Enrollment in the workshops is filled on the basis of completed workshop registration forms and fees received. Continuing Education credits will be awarded to all in attendance at the entire workshop. Cancellations are accepted until February 26, 2008, less a $75 administrative fee. No refunds will be granted after February 26, 2008.

**Wednesday, March 26, 2008**

**Workshop #1**
Wednesday, March 26, 8:00 am - 4:00 pm
Full-Day
7 CE Credits

*Toward an Etiologic and Attachment-Related Understanding of the Origins of the MMPI/MMPI-2 Codetypes*
Alex B. Caldwell
UCLA Departments of Psychology and Psychiatry
Culver City, CA

This is a one-day workshop developing Dr. Caldwell’s etiologic hypotheses as to the origins and developmental patterns of the codetypes. It starts with the proposition that we can conceptualize all behavior as somehow *adaptive*, given the person’s life experiences, constitutional vulnerabilities, and current circumstances. Data to date support the hypothesis that the codetypes are taxonic rather than dimensional (as per P. E. Meehl’s distinction) and that taxonicity implies a specifiable etiology. To a considerable extent the MMPI is seen as reflecting the consequences of occasions and repetitive sequences of classical conditioning of the person’s emotional sensitivities and patterns of arousal and inhibition. Successful avoidance, escape, and compensatory behaviors would include many operant aspects that are reinforced by tension reductions. Genetic factors play an active role mainly as vulnerabilities to corresponding aversive or traumatic inputs; their presence is argued by the large amounts of heritability in the scales analyzed individually. There is no assumption that there is only one avenue to a specific codetype: there may be varied dispositions and experiences that lead to the more-or-less same emotional outcome. An array of codetypes will be successively reviewed. They will be chosen to demonstrate the diversity of etiologic patterns. Each of these will include identification of the subset of profiles included, salient and typical
behaviors, and the most likely shaping effects that influence the behavioral outcomes. Dr. Caldwell will conclude with some general considerations as to the future decision-making consequences and treatment implications of such a systematic conceptualization of human suffering as well as broader implications for understanding all of psychopathology.

**Goals and Objectives:**
1. A more complete understanding of the distinctive emotional and behavioral qualities of the codetypes
2. Learning hypotheses that will sharpen the focus of therapeutic interventions
3. Better guided decision-making in both treatment choices and forensic settings
4. Increased clinical empathy

**Skill Level:** This workshop requires a basic level understanding of MMPI/MMPI-2.

**Workshop #2**
Wednesday, March 26, 8:00 am - 4:00 pm
Full-Day
7 CE Credits

*Attachment and Child Custody: A Sensible Marriage*

**Ginger C. Calloway, Ph.D.**
Private Practice
Raleigh, NC

**Robert Marvin, Ph.D.**
Mary D. Ainsworth Child-Parent Attachment Clinic
Charlottesville, VA

This workshop is proposed to expand the information previously provided to SPA participants about attachment theory and patterns of attachment as conceptualized and applied to child custody work and other forensic evaluations of children. The presenters will review the literature about attachment theory and will discuss theories of attachment, particularly the Circle of Security as a tool in understanding attachment patterns and the functions of attachment. The presenters will demonstrate patterns of attachment by use of videotaped vignettes showing children and parents in the Strange Situation. We want workshop participants to observe and comment upon the vignettes as we reference and discuss the underlying developmental norms and issues about which evaluators of children in any forensic setting should be knowledgeable. Our goal is to unite theory about attachment, an understanding of child development and application of attachment theory and patterns of attachment to young children in varied settings of forensic practice. The workshop will briefly address the social policy consequences of judges, attorneys and psychologists making custody access decisions for young children without benefit of knowledge about child development and attachment theory. The third area this workshop will address is the specific application of attachment theory and information about patterns of attachment to child custody work. We plan to draw on the articles that will appear before the conference in a special issue of the *Journal of Child Custody*, edited by Ginger Calloway and Bob Erard, devoted to attachment and child custody.
**Goals and Objectives:** Participants will
1. Know and recognize different styles of attachment patterns and parenting styles;
2. Recognize specific behavioral aspects of attachment patterns from observation of children and parents engaged in the Strange Situation;
3. Be able to discuss children’s behavior during the Strange Situation with reference to the Circle of Security;
4. Understand the utility of identifying attachment behaviors in reports of children and parents in varied forensic settings;
5. Understand how to communicate attachment behaviors and their significance to the Court, attorneys and other psychologists.

**Skill Level:** Participants should have an intermediate to advanced understanding of child development issues, perhaps a beginning level of knowledge about attachment theory.

**Workshop #3**  
Wednesday, March 26, 8:00 am - 4:00 pm  
Full-Day  
7 CE Credits

**Forensic Consultation with the Rorschach**  
F. Barton Evans, Ph.D.  
Northern Rockies Center for Forensic and Therapeutic Assessment  
Bozeman, MT  
Bruce L. Smith, Ph.D.  
University of California  
Berkeley, CA

The emphasis will be on the role of Rorschach assessment in diverse forensic contexts and how information from the Rorschach informs and illuminates forensic consultations. The workshop will focus on the use the Rorschach in conjunction with other methods to consult to attorneys, courts, and other participants at various points in the legal process. The workshop will begin with the presentation of a model for approaching forensic assessments and consultations. In addition, evidentiary issues with regard to Rorschach data will be discussed. Case material will be presented from a variety of legal contexts including criminal, immigration, employment, and other civil litigation. The emphasis in the discussion of the case material will be on how to draw legally relevant inferences from the Rorschach, how to integrate these with other data, and how to present these in consultation with attorneys, judges, and trial courts.

**Goals and Objectives:** Participants will learn
1. How to evaluate the role of the Rorschach in a forensic consultation;
2. How to consult to the various participants in different forensic settings and about the different kinds of relationships that influence these consultations;
3. About which Rorschach variables and interpretations can be used to provide information useful to the various forensic consultees;
4. About the different kinds of information that is useful for different forensic contexts (e.g., civil, criminal, immigration, etc.).
**Skill Level:** This is an intermediate to advanced level workshop on the use of the Rorschach in forensic contexts. Participants should have some familiarity with forensic psychology and be conversant with the use of the CS for the Rorschach.

**Workshop #4**
Wednesday, March 26, 8:00 am - 4:00 pm
Full-Day
7 CE Credits

*Measuring Interpersonal Behavior: From Timothy Leary to the 21st Century*

Aaron L. Pincus, Ph.D.
The Pennsylvania State University, University Park, PA
Stephen N. Strack, Ph.D.
VA Ambulatory Care Center, Los Angeles, CA
Debbie S. Moskowitz, Ph.D.
David C. Zuroff, Ph.D.
McGill University, Montreal, Canada

This workshop will cover the modern tradition in interpersonal assessment that began in the early 1950s when Timothy Leary and colleagues operationalized Harry Stack Sullivan’s model of personality. Sullivan’s main tenet was that personality does not reside “in” a person, but rather in “the relatively enduring pattern of recurrent interpersonal situations which characterize a human life.” Leary’s group developed the first circular model of personality, later called a circumplex, and published the Interpersonal Check List (LaForge & Suczek, 1955) a measure of 16 interpersonal variables that followed their circular model. The instructors will provide a didactic introduction to the history of interpersonal theory from 1950 to the present, and teach how to use the most frequently applied interpersonal instruments for research and practice, among them Wiggins’ Interpersonal Adjective Scales, Horowitz’s Inventory of Interpersonal Problems, Benjamin’s Intrex questionnaire, and Kiesler’s Impact Message Inventory and Check List of Interpersonal Transactions. Recent advances in the field will also be presented: The metaconcepts of agency and communion, and how to measure interpersonal variability (i.e., flux, pulse, and spin) with the Social Behavior Inventory.

**Goals and Objectives:** Participants will learn
1. The history of interpersonal theory and assessment from 1950 to the present;
2. The nature and properties of the interpersonal circumplex;
3. How to use a variety of self-report and observer rating measures to assess interpersonal behavior for research and practice;
4. The meaning of agency and communion in understanding interpersonal behavior;
5. How to measure interpersonal flux, pulse, and spin.

**Skill Level:** This workshop will be taught at an introductory level, so no prior experience with these measures is needed. However, participants should have an interest and familiarity with interpersonal approaches to personality.
There has been much controversy over the past years concerning Rorschach interrater agreement and interrater reliability issues. Issues discussed include what kind of data should be the base for agreement calculations, what statistics should be used in accounting agreement, and what kind of evidence of reliability should be routinely reported in Rorschach research. This practically-oriented workshop will suggest choices for procedures in conducting a Rorschach reliability study, including how to report results, and give hands-on practice in calculating agreement on real-life Rorschach data sets. Calculating univariate and multivariate response-level agreement, as well as protocol-level agreement, for two or more coders, either the same for all protocols or different for different protocols, will be covered. Software for interrater agreement calculations will be demonstrated—bring your laptops!

Goals and Objectives:
1. Repeat basic concepts of reliability theory;
2. Give an overview of issues around Rorschach intercoder agreement discussed in the recent literature;
3. Outline the important choices for designing a Rorschach intercoder agreement study list, giving a rationale for each item, information and results to report from a Rorschach intercoder agreement study;
4. Provide practice in calculating agreement/reliability measures from Rorschach Comprehensive System data.

Skill Level: Familiarity with the Rorschach Comprehensive System is expected, as well as Master’s level training in quantitative research methods.

Our understanding of Adult ADHD has evolved considerably in recent years. Once thought to be a childhood disorder outgrown by adolescence, research has documented persistence of symptoms of the disorder into adulthood in 50-75% of cases of childhood ADHD. Adult ADHD is associated with considerable dysfunction including lower levels of education attainment, impaired functioning in social relationships, problems in the workplace, higher rates of...
legal problems, and increased rates of alcohol and substance abuse. In addition, Adult ADHD often co-occurs with other psychiatric disorders, including depression, Bipolar Disorder, and personality disorders. Available research indicates that left untreated, Adult ADHD can contribute to considerable dysfunction in adult psychosocial, occupational, and educational functioning. This underscores the importance of providing appropriate treatment for patients with this condition. However, studies suggest that Adult ADHD is often undiagnosed and untreated. This may reflect the complexities in accurately diagnosing Adult ADHD, identifying co-morbid conditions, and distinguishing it from other disorders which have similar or overlapping symptoms; i.e., Bipolar Disorder or Borderline Personality Disorder.

**Goals and Objectives:**
1. Reviewing the criteria needed to make a diagnosis of Adult ADHD;
2. Increasing appreciation of difficulties commonly encountered when this diagnosis is considered, such as the biasing effects of retrospective reporting;
3. Highlighting the strengths and limitations of some existing questionnaires and measures of cognitive and attentional functioning;
4. Illustrating the utility of standard personality instruments, specifically the MMPI-2 and Rorschach, in the process of differential diagnosis and treatment planning.

**Skill Level:** This is an intermediate level workshop.

**Workshop #7 - CANCELED**
Wednesday, March 26, 5:00 pm - 8:30 pm
Half-Day
3.5 CE Credits

*Polymorphous Perversion and Psychopathy 2*
J. Reid Meloy, Jr., Ph.D.
Forensis, Inc.
San Diego, CA

This workshop will further explore the theory, research findings, forensic data, and clinical material associated with the strong, empirically established relationship between sexual perversion and psychopathy. Personality test data from cases of extreme sexual aggression will be reviewed to illustrate the psychological underpinnings of this phenomenon. Dr. Meloy will emphasize the use of clinical material to individualize and contextualize the findings of actuarial instruments.

**Goals and Objectives:** Participants will learn
1. The contemporary research on psychopathy and sexual offending;
2. About the association between sadism and psychopathy;
3. How to individualize actuarial data;
4. To assess for paraphilic interests in psychopathy.

**Skill Level:** This is an advanced level workshop.
Workshop #8
Thursday, March 27, 8:00 am - 11:30 am
Half-Day
3.5 CE Credits

A Role-Based Approach to Thematic Apperceptive Techniques: Research and Practice
Sharon Rae Jenkins, Ph.D.
University of North Texas, Denton, TX
Antoinette Thomas, Ph.D.
Private Practice, St. Lambert, Canada

To evaluate patients’ problems in light of their social roles, this TAT scoring approach integrates research on person-situation interaction with practical validity generalization specific to clients’ life circumstances. Many clinicians use picture-story techniques to sample clients’ responses to stimuli that represent specific social role relationships. However, no widely used scoring systems have provided empirical data supporting such use. This workshop teaches three systems scored from manuals that are currently in press, along with research summaries, in the Handbook of clinical scoring systems for thematic apperceptive techniques. Thomas’s Affective Scale identifies role relationships among story characters and scores each between -2 and +2 according to the relationship’s affective valence. The differential between scores for spousal relationships and other relationships (especially parental) distinguishes happily married couples from those less happily married. Feffer’s Decentering System scores interactions between characters on a 9-point scale from undifferentiated through sequential to simultaneous interaction (internalization) at increasing levels of complexity. High scorers are better at differentiating characters and perspectives in Feffer’s Role-Taking Task; violence perpetrators score lower than other outpatients. Summers’ Symbiosis measures degrees of differentiation vs. psychological merger in clients’ relationships with others via nine components of symbiotic attachment. This system distinguished hospitalized young adults with schizophrenia and their parents from those hospitalized with other disorders, and both from those with no psychiatric disorder. Research on three data sets is ongoing. Treatment planning recommendations and the scientific rationale for generalization to clients’ life circumstances are discussed. The workshop process illustrates a group training model.

Goals and Objectives: Participants will
1. Experience a structured process for learning and teaching TAT scoring systems;
2. Receive a general orientation to the theory and applications of role-based TAT scoring;
3. Be introduced to the primary validational evidence for three role-based TAT scoring systems;
4. Acquire an introductory level of competence in scoring three role-based TAT scoring systems.
Skill Level: Minimum skill level; i.e., graduate student status with one course in personality assessment that includes either the TAT or the Rorschach Comprehensive System.

Workshop #9
Thursday, March 27, 8:00 am - 11:30 am
Half-Day
3.5 CE Credits

Violence Risk Assessment, Part I: Kids Who Kill
Nancy Kaser-Boyd, Ph.D.
Geffen School of Medicine at UCLA
Los Angeles, CA

Violence risk assessment in children draws from a unique literature and is distinct from violence prediction in adults. Dangerous, acting-out children can be seen at all age groups—from the very young, who tend toward impulsive, angry acts, to adolescents who give the outward appearance of planning. Accurate risk assessment requires competence in several areas, e.g., base rates for violence in children, child abuse and its relationship to violent acting-out, developmental psychology, attachment disorders, and the assessment of underlying personality structure. This workshop will review each area, providing references for additional reading. Evaluating the individual child to evaluate violence risk will be illustrated with case histories, psychological test materials [Rorschach, Roberts, MMPI-A] and the presenter’s children’s violence risk assessment checklist. Cases presented will include children who killed a parent, a school shooter, and a violent child with a successful treatment. The workshop will include a component for the expert witness who must address legal issues surrounding mental state, fitness for juvenile court, and amenability to treatment.

Goals and Objectives:
1. To know the common risk factors of violence in children and adolescence.
2. To develop skill in integrating data from psychological tests, interviews, and life history to accurately identify risk of violence.
3. To know legal and ethical requirements regarding violence risk.
4. To learn how to take steps to protect intended targets.

Skill Level: Participants must be at an advanced level in psychological assessment, with tools such as the Rorschach and the MMPI-A.

Workshop #10
Thursday, March 27, 8:00 am - 11:30 am
Half-Day
3.5 CE Credits

A Review of the Validity Research on the Rorschach’s Comprehensive System Variables
Joni L. Mihura, Ph, Ph.D.
University of Toledo
Toledo, Ohio
This workshop provides practitioners, teachers, and researchers with a systematic review of the validity of individual variables in the Rorschach Comprehensive System (CS) Structural Summary. Meta-analyses provide good support for the overall or ‘global’ validity of the Rorschach. However, the results of these global meta-analyses do not directly address the validity of each individual scale. That is, knowing that the Rorschach, overall, has acceptable validity does allow us to conclude that all of the individual variables have acceptable validity. Therefore, the main goal of this workshop is to report the results of a review of the published research literature for the individual CS variables in the lower portion of the Structural Summary (i.e., the Ratios, Percentages, and Derivations section), including the Constellation scales. The various study methods and designs that have been used for Rorschach research will be summarized. An overview of the validity research for the scales will be presented. Challenges for synthesizing and understanding the research findings will be discussed. The workshop is designed to be helpful for practitioners, teachers, and researchers – practitioners can use the research to inform their clinical decisions; teachers can provide this information to their students; and researchers can use the information towards future research studies.

**Goals and Objectives:**
1. Understand the various types of methods and designs used in Rorschach studies, currently and historically;
2. Be familiar with the extent and nature of the published research for the Rorschach Structural Summary variables;
3. Understand important issues related to evaluating, synthesizing, and applying the research literature to practice.

**Skill Level:** This is an intermediate level workshop. Basic knowledge about Rorschach Comprehensive System administration, scoring, and interpretation is necessary.

**Workshop #11**
Thursday, March 27, 8:00 am - 11:30 am
Half-Day
3.5 CE Credits

**Assessing Somatoform Disorders**
**David M. Ranks, Ph.D.**
LDS Hospital and Private Practice
North Salt Lake, UT

Participants will be introduced to the state of the art in understanding how processes involved in attachment alter the structure of the right side of the brain. They will learn how to combine understanding of the MMPI, PAI, Rorschach and DAP with a neuropsychoanalytic framework to understand people presenting with somatoform disorder and high medical utilization, and will be presented with a model for understanding how these relate to Cluster B disorders. The workshop will present an integrative model, as well as helping to understand the contributions, limitations, and overlap of these measures to develop a deeper understanding of the person and their problems. Information from each measure will be explored in depth to assist in understanding how the relevant factors present on each test. This will be complemented with
information from a set of memory/symptom validity tests: the Word Memory Test, Non-Verbal Medical Symptom Validity Test, Medical Symptom Validity Test, and Memory Complaints Inventory. Serial testing will show changes as all of the presenting symptoms remitted. If desired, data from neuropsychological assessment can also be presented using the Halstead-Reitan Battery to show how these personality measures clarify and extend the neurocognitive findings to provide clear and specific answers to the referral question, and allow helpful and effective feedback to the client.

Goals and Objectives: Participants will
1. Understand how impaired attachment leads to altered neurobiology in the right brain, and how this in turn alters perception and information processing.
2. Understand how this expressed on the PAI, MMPI and Rorschach tests, and some of the underlying processes these findings reflect
3. Understand how the integration of the key neurobiological factors points to critical treatment objectives, with an example of areas that will change as a result of treating these.

Skill Level: This workshop is intermediate to advanced.

Workshop #12
Thursday, March 27, 8:00 am - 11:30 am
   Half-Day
   3.5 CE Credits

Developments in Statistics for Personality Assessment
David L. Streiner, Ph.D.
Baycrest Centre and the University of Toronto
Toronto, Canada

There have been many developments in statistics and measurement theory since many of us left school. These range from “new” definitions of validity and reliability on the use of confirmatory factor analysis in hypothesis training; greater clarity regarding the correct (and incorrect) use of exploratory factor analysis in scale construction; and a better appreciation of diagnostic decision making statistics (e.g., sensitivity, specificity, positive and negative predictive power); and so on. This workshop will cover many of these changes, and have enough time to allow discussion of issues to be brought by participants.

Goals and Objectives:
1. Learn about new directions in reliability and validity.
2. Learn the differences between exploratory and confirmatory factor analysis, and when to use (and not use) each.
3. Learn about properties of diagnostic tests, and how to use the STARD flow-sheet.

Skill Level: Participants should have taken graduate level courses in statistics and psychometric theory.
Workshop #13
Sunday, March 30, 8:00 am - 4:00 pm
Full-Day
7 CE Credits

Interpreting the Millon Clinical Multiaxial Inventory
James P. Choca, Ph.D.
Edward Rossini, Ph.D.
Roosevelt University
Chicago, IL

The workshop will start with an overview of the MCM by Jim Choca, followed by a detailed explanation of the interpretative system he has developed. This system, detailed in Choca’s book on the MCM, uses the concept of personality styles as the basis for the interpretations. Ed Rossini will present material on the integration of the MCM with other tests, particularly with findings from the Rorschach and the Thematic Apperception Test. The workshop will include ideas on the use of MCM data to inform the treatment of the patient (Choca). Finally, both presenters will share MCM data on interesting cases they have done and will engage the audience in interpreting and discussing the protocols.

Goals and Objectives:
1. Interpret the MCM using the personality style of the individual;
2. Integrate MCM results with projective tests;
3. Use the test in a forensic setting;
4. Use MCM data to inform the treatment of the patient.

Skill Level: Minimal knowledge of the MCM is required.

Workshop #14
Sunday, March 30, 8:00 am - 4:00 pm
Full-Day
7 CE Credits

Ethics in Psychological Assessment
Mary A. Connell, Ed.D.
Independent Practice
Forth Worth, TX

This workshop will examine ethical issues that arise in psychological assessment, including test selection, administration, and integration/report of findings. Confidentiality concerns will be examined in the use of online administration and scoring services and responding to subpoenas and other requests for records. Practical examples of dilemmas that arise in clinical and forensic practice will be explored in a lecture/discussion format.

Goals and Objectives:
1. Five things to consider when adopting a new assessment instrument;
2. How to distinguish test data from test materials for purposes of release of information;
3. A practical approach to identifying and responding to ethical issues that may arise in providing assessment services;
4. Information to help me place assessment results in the context of clinical services;
5. Understanding of the role of assessment in forensic matters.

**Skill Level:** This is an intermediate to advanced level workshop.

**Workshop #15**
Sunday, March 30, 8:00 am - 4:00 pm
Full-Day
7 CE Credits

*Introduction to Therapeutic Assessment: Using Psychological Testing as Brief Therapy*

Stephen E. Finn, Ph.D.
Center for Therapeutic Assessment
Austin, TX

Psychological assessment is typically viewed as something one does to diagnose psychological disorders or to plan for or evaluate an intervention. This workshop presents a new paradigm for the psychological assessor, Therapeutic Assessment, where collaborative psychological testing itself is a powerful intervention for individuals, couples, children, and adolescents. In this introductory workshop, Dr. Finn will provide his conceptualization for how Therapeutic Assessment works and will present the different steps for how to conduct this method in practice. In addition to the presentation of didactic material and discussion, Dr. Finn will show video vignettes from his sessions with clients to demonstrate the power and impact of this model.

**Goals and Objectives:** Participants will
1. Understand a model that uses psychological assessment as a therapeutic intervention as well as an information gathering tool;
2. Understand the active therapeutic factors in psychological assessment and how to maximize them;
3. Understand the goals of an initial session in therapeutic assessment;
4. Know how test instruments can be used to demonstrate assessment findings to clients;
5. Understand how test feedback sessions can positively impact clients;
6. Learn about a style of psychological report that can be shared with clients.

**Skill Level:** Familiarity with standard psychological assessment instruments such as the WAIS-III, the MMPI-2, the Rorschach, and the TAT is necessary, and is the introductory step toward advanced training in and practice of Therapeutic Assessment.

**Workshop #16**
Sunday, March 30, 8:00 am - 11:30 am
Half-Day
3.5 CE Credits
**Introduction to the Personality Assessment Inventory**  
**John E. Kurtz, Ph.D.**  
Villanova University  
Villanova, PA

This workshop offers a basic introduction to the use and interpretation of the Personality Assessment Inventory (PAI). No previous experience with the PAI is necessary; however, attendees should be familiar with basic principles of psychometrics. The first hour of the workshop will cover the unique features of the PAI, including an overview of the full scales and subscales. The process of PAI scale development will be described to illustrate the use of construct validation principles in the construction of the instrument. Demographic information about the three normative reference samples (community, clinical, and college) will be provided with suggestions for the appropriate selection of norm group comparisons. The second hour will introduce four approaches to evaluating protocol validity, including the detection of careless or random responding, negative distortion versus malingering, and positive distortion versus overt defensiveness. Several empirical approaches to making psychodiagnostic inferences and clinical decisions will also be presented. In the final hour, supplemental indexes for the evaluation of suicidal risk and violence potential will be introduced, and the use of the PAI for evaluating prognosis and selecting appropriate treatment strategies will be described. Case studies will be presented to illustrate the various procedures presented in the workshop.

**Goals and Objectives:**
1. Describe the development of the PAI as an example of construct validation strategies in test construction;
2. Review and evaluate various strategies for establishing the validity of PAI protocols;
3. Discuss approaches to PAI interpretation for psychodiagnosis, clinical decision-making, and treatment planning;
4. Illustrate these approaches to PAI interpretation with case examples.

**Skill Level:** No previous experience with the PAI required. Familiarity with basic psychometric principles will be assumed.

**Workshop #17**  
Sunday, March 30, 8:00 am - 11:30 am  
Half-Day  
3.5 CE Credits

**Using the MMPI-A in Forensic Evaluations**  
**Robert P. Archer, Ph.D.**  
Eastern Virginia Medical School  
Norfolk, VA

The MMPI, and more recently the MMPI-A, has an extensive research and clinical base in terms of the assessment of adolescents in forensic setting. The MMPI-A may serve as an important component of the evaluation of adolescents to address a broad variety of forensic issues. This workshop will provide a general overview of the juvenile justice system, and review the applications of the MMPI-A in these settings. The workshop will also address salient aspects of the use of the MMPI-A to address other legal issues, including those involved in
person injury litigation and child custody hearings. A series of administration criteria for the MMPI-A will be presented. The use of the MMPI-A in conjunction with other forensic assessment instruments such as the Massachusetts Youth Screening Instrument-2 (MAYSI-2) by Grisso and Barnum (1998), and the Psychopathology Checklist – Revised (Youth Version) (PCL: YV) by Forth, Kosson and Hare (2003), will also be discussed. A model of MMPI-A Validity Scale interpretation will be presented to maximize the effectiveness of these scales in detecting malingered profiles, as well as guarded and/or defensive protocols. The value of using the MMPI-A in the courtroom setting will be reviewed, including suggested approaches to presenting MMPI-A data in depositions or courtroom testimony. Finally, an MMPI-A clinical case example from a forensic evaluation will be presented to illustrate salient interpretive principles. The role of the MMPI-A within a comprehensive in providing objective information to a tryor of fact in reference to specific legal standards or issues typically encountered in adolescent forensic evaluations.

**Goals and Objectives:**
1. Overview the common uses of the MMPI-A in forensic settings.
2. Review a model of validity assessment using the MMPI-A Validity Scales.
3. Overview suggestions for the presentation of MMPI-A findings in courtroom settings.
4. Uses of MMPI-A clinical case example to illustrate important interpretation principles.

**Skill Level:** This is a workshop for individuals with limited exposure to the MMPI-A.

---

**2008 SPA Annual Meeting Program**

**Continuing Education Credit**
As part of its SPA Annual Meeting program, the Society for Personality Assessment will offer continuing education credits for the two Master Lectures, the Bruno Klopfer Award presentation, the Hertz Memorial Lunch and 20 symposia, roundtables, and/or case discussions. The Society is approved by APA to sponsor continuing education for psychologists, and SPA maintains responsibility for this program and its content.

- **Bruno Klopfer Award Presentation,** Thursday, March 27, 3:00-4:00 pm, (1 CE Credit)
- **Master Lecture I:** Heisenberg, Kandinsky, and the Heteromethod Convergence Problem: Lessons from Within and Beyond Psychology **Thursday, March 27, 4:15-5:15 pm** (1 CE credit)
- **Symposium A:** Research to Enhance the Rorschach, Friday, March 28, 8:30-10:30 am (2 CE credits)
- **Case Discussion B:** Sexual Harassment Case, **Friday, March 28, 8:30-10:30 am** (2 CE credits)
- **Master Lecture II:** The Five Assessment Issues You Have in Heaven, **Friday, March 28, 10:45-11:45 am** (1 CE credit)
- **Hertz Memorial Lunch**: in memory of Jerry S. Wiggins, *Friday, March 28, 12:00-1:15 pm (1 CE credit)*

- **Special Lunchtime Presentation**: Thinking Through Self-Report Profiles to Generate Hypotheses and Conceptualizations, *Friday, March 28, 12:00-1:15 pm (1 CE credit)*

- **Case Disc F**: Sexual Offenders, *Friday, March 28, 12:00-1:15 pm (1 CE credit)*

- **Symposium G**: JPA Supplement/International Reference Samples for the Rorschach Comprehensive System, *Friday, March 28, 1:15-3:15 pm (2 CE Credits)*

- **Symposium H**: Violence Risk Assessment, *Friday, March 28, 1:15-3:15 pm (2 CE credit)*

- **Symposium I**: Conceptual Innovations in Personality Assessment, *Friday, March 28, 1:15-3:15 pm (2 CE Credits)*

- **Symposium L**: Assessing Perceptual Accuracy on the Rorschach, *Friday, March 28, 3:30-5:30 pm (2 CE Credits)*

- **Symposium M**: The Interface of Clinical and Research Methods in Collaborative Neuropsychology, *Friday, March 28, 3:30-5:30 pm (2 CE Credits)*

- **Symposium O**: Developing a Test for the 21st Century: The Emotional Attachment System, *Friday, March 28, 3:30-5:30 pm (2 CE Credits)*

- **Symposium A**: Telling the Story of a Collaborative Personality Assessment Case, *Saturday, March 29, 8:00-10:00 am (2 CE credits)*

- **Symposium B**: Disorganized Attachment and Custody, *Saturday, March 29, 8:00-10:00 am (2 CE credits)*

- **Symposium C**: Psychoanalytic Theory and the Rorschach Method, *Saturday, March 29, 8:00-10:00 am (2 CE credits)*

- **Roundtable F**: Child Custody Evaluations: Is the Use of Psychological Testing Being Threatened? *Saturday, March 29, 10:15 am-12:15 pm (2 CE credits)*

- **Symposium G**: The Wartegg Test, *Saturday, March 29, 10:15 am-12:15 pm (2 CE credits)*

- **Case Discussion H**: Personality Assessment in Police Psychology, *Saturday, March 29, 10:15 am-12:15 pm (2 CE credits)*

- **Symposium I**: The Legacy of Jerry S. Wiggins, *Saturday, March 29, 10:15 am-12:15 pm (2 CE credits)*

- **Case Discussion K**: Case Using Local Norms and International Adult Composite Norms to Assess an Adult Male, *Saturday, March 29, 1:30-3:30 pm (2 CE credits)*

- **Roundtable L**: Innovative Teaching of Personality Assessment, *Saturday, March 29, 1:30-3:30 pm (2 CE credits)*

- **Symposium P**: Integrating Attachment in Adolescent Assessment and Clinical Cases, *Saturday, March 29, 3:45-5:45 pm (2 CE credits)*

- **Symposium Q**: Cognitive and Affective Constructions of Treatment Resistant Patients, *Saturday, March 29, 3:45-5:45 pm (2 CE credits)*
Wednesday, March 26, 2008

7:30 am – 4:00 pm  Registration
Atrium Foyer

8:00 am – 4:00 pm  Full-Day Workshops (4)

#1 - Toward an Etiological and Attachment-Related Understanding of the Origins of the MMPI/MMPI-2 Codetypes  
Alex B. Caldwell  
River Bend 2

#2 – Attachment and Child Custody: A Sensible Marriage  
Ginger C. Calloway, Robert Marvin  
River Bend 1

#3 – Forensic Consultation with the Rorschach  
F. Barton Evans, Bruce L. Smith  
Julia

#4 – Measuring Interpersonal Behavior: From Timothy Leary to the 21st Century  
Stephen N. Strack, Aaron L. Pincus, Debbie S. Moskowitz, David C. Zuroff  
New Levee

8:00 am – 11:30 am  Half-Day Workshop-Morning (1)  
#5 – Calculating and Reporting Rorschach Intercoder Agreement  
Harald Janson  
Fulton

1:00 pm – 4:30 pm  Half-Day Workshop-Afternoon (1)  
#6 - Comprehensive Assessment of Adult ADHD  
Ronald J. Ganellen  
Fulton

4:30 pm  Board of Trustees Meeting and Dinner  
Wolfe’s

Thursday, March 27, 2008

7:30 am – 4:00 pm  Registration
Silent Auction Sign-up
Atrium Foyer

8:00 am – 12 noon  Board of Trustees Meeting  
Cotton Blossom

8:00 am – 11:30 am  Exhibit/Bookstore Setup
Atrium Foyer

8:00 am – 11:30 am  Half-Day Workshops-Morning (5)

#8 - A Role-Based Approach to Thematic Apperception Techniques: Research and Practice  
Sharon Rae Jenkins, Antoinette Thomas  
Fulton

#9 - Violence Risk Assessment, Part I: Kids Who Kill  
Nancy Kaser-Boyd  
New Levee
#10 – A Review of the Validity Research on the Rorschach Comprehensive System Variables
Joni L. Mihura

#11 – Assessing Somatoform Disorders David M. Ranks

#12 – Developments in Statistics for Personality Assessment David L. Streiner

11:30 am – 1:00 pm Lunch Break

12:00 noon – 5:00 pm Exhibits Open

1:00 pm – 2:00 pm Writing Cases and Clinical Topics for Publication in JPA New Levee
Gregory J. Meyer, University of Toledo, Toledo, OH
Robert E. Erard, Psychological Institutes of Michigan, Franklin, MI
Leonard Handler, University of Tennessee, Knoxville, TN
Jed A. Yalof, Immaculata University, Immaculata, PA

1:00 pm – 2:00 pm Open Consultation Session MS Queen
Marshall Silverstein, Long Island University, Roslyn, NY

1:00 pm – 2:00 pm Open Consultation Session Delta Queen
David S. Nichols, Portland, OR

1:00 pm – 2:00 pm Research Consultation Fulton
Mark A. Blais, Harvard Medical School and Massachusetts General Hospital, Boston, MA

1:00 pm – 2:00 pm ABAP Diplomate Preparation Creole Queen
Edward E. Gotts, Massachusetts School of Professional Psychology, Boston, MA

2:00 pm – 3:00 pm Opening Plenary Session River Bend Bllrm
Opening Remarks
Robert E. Erard, Program Chair and President-Elect, SPA Board of Trustees

Presidential Address
The Quiet Voices of Personality Assessment: Raising the Amplitude
Virginia M. Brabender, President
SPA Board of Trustees

Tai Katzenstein, Massachusetts General Hospital and Harvard Medical School, Boston, MA

Rorschach Predictors of Adolescents’ Response to Atypical Neuroleptics
David L. Pogge, Four Winds Hospital, Katonah, NY
Laura Coraci, Fairleigh Dickinson University, Teaneck, NJ
Liza Maldari, Fairleigh Dickinson University, Teaneck, NJ
John Stokes, Pace University, New York, NY
Phil Harvey, Emory University School of Medicine, Atlanta, GA

Paper Session E: The Rorschach
Chair: Barry A. Ritzler, Long Island University, Brooklyn, NY

Empirical Foundation of the Rorschach Comprehensive System
Barry A. Ritzler, Long Island University, Brooklyn, NY

The Impact of Retesting on Examinees Providing Brief Rorschach Protocols
Rex Collins, The Willow Centre, North York, ON, Canada
Baseline Ego Impairment on the Rorschach as a Predictor of Five-Year Outcome in First Episode Psychosis

Ragnhild Holmqvist, Stockholm, Sweden

Integration of Data in Comprehensive System-Based Personality Assessment

Olli-Pekka S. Santala, Helsinki University Central Hospital and University of Jyvaskyla, Kirkkonummi, Finland
Carl-Erik Mattlar, University of Jyvaskyla, Kirkkonummi, Finland

The Comprehensive System and Skill in Personality Assessment

Olli-Pekka S. Santala, Helsinki University Central Hospital and University of Jyvaskyla, Kirkkonummi, Finland
Carl-Erik Mattlar, University of Jyvaskyla, Kirkkonummi, Finland

10:45 am – 11:45 am    Master Lecture II (1 CE credit)  River Bend Bllrm

The Five Assessment Issues You Have In Heaven

Gary Groth-Marnat, Ph.D.
Pacifica Graduate Institute
Carpinteria, CA

11:45 am – 1:15 pm SPAGS Board Meeting  Cotton Blossom

11:45 am – 1:15 pm Lunch Break

12:00 pm – 1:15 pm Hertz Memorial Lunch (1 CE Credit) in memory of Jerry S. Wiggins, Ph.D. Julia

Stephen N. Strack, Aaron L. Pincus, David S. Nichols

With special guest, Krista Trobst

12:00 pm – 1:15 pm Special Lunch Presentation (1 CE Credit) Bridge Room

Thinking Through Self-Report Profiles To Generate Hypotheses and Conceptualizations

Radhika Krishnamurthy, Ph.D.
Florida Technical Institute
Melbourne, FL

Self-report measures provide a valuable basis of hypothesis-generation and case conceptualization even when profiles are deemed minimally interpretable or invalid (e.g., over-report or under-report profiles). This is possible when the assessor utilizes a therapeutic assessment paradigm, adopts a broader focus than one of symptom- or disorder identification, and construes the responses in the context of the referral reason and client behaviors surrounding the assessment. Cases involving MMPI-2, MMPI-A, and CBCL/YSR assessment will be used to demonstrate how clinicians could develop useful propositions from self-report profiles.
12:00 pm – 1:15 pm    Scientific Session

**Case Discussion F: Discriminating Markers of a Sexual Offender: The Potential of Rorschach in Two Discriminating Cases (1 CE credit)**

*New Levee*

Alissa Sherry, The University of Texas, Austin, TX  
Trae Gilbert, The University of Texas, Austin, TX

1:15 pm – 3:15 pm    Scientific Sessions (5)

**Symposium G: The JPA Supplement on International Reference Samples for the Rorschach Comprehensive System (2 CE Credits)**

*New Levee*

Chair: Thomas Shaffer, Private Practice, Fresno, CA

JPA Special Supplement Issue: International Reference Samples for the Rorschach CS: Introductory Comments  
Thomas Shaffer, Private Practice, Fresno, CA

An Overview of Findings from the JPA Supplement on International Reference Samples for the Rorschach CS  
Gregory J. Meyer, University of Toledo, Toledo, OH

The International Supplement: Its Implications Inside and Outside the Rorschach Community  
S. Philip Erdberg, Private Practice, Corte Madera, CA

Discussant: Anne Andronikof, Paris 10 University, France

**Symposium H: Violence Risk Assessment: What We Have Learned, What We Need to Learn (2 CE Credits)**

*Fulton*

Chair: Ronald J. Ganellen, Northwestern University Medical School, Chicago, IL

Violence Risk Assessment: An Introduction  
Ronald J. Ganellen, Northwestern University Medical School, Chicago, IL

Methods Used to Assess Violence Potential  
Nancy Kaser-Boyd, Geffen School of Medicine, UCLA, Los Angeles, CA

Rorschach Assessment of Violence, Aggression, and Trauma  
Peder Norbech, University of Oslo, Oslo, Norway  
Marianne Opaas, Norwegian Centre for Violence and Traumatic Stress, Studies, Norway  
Cato Gronnerod, University of Oslo, Oslo, Norway  
Ellen Hartmann, University of Oslo, Oslo, Norway  
Corine de Ruiter, Utrecht, The Netherlands

**Symposium I: Conceptual Innovations in Personality Assessment (2 CE Credits)**

*MS Queen*
Chair: Carol Groves Overton, Private Practice, Washington Crossing, PA

A Theoretical Approach to the Human Movement Response
  Carol Groves Overton, Private Practice, Washington Crossing, PA

Empathy, Intersubjectivity, and the Longing to be Known: Why Personality Assessment Works
  Stephen E. Finn, Center for Therapeutic Assessment, Austin, TX

Similarities of Collaborative Assessment and White and Epstein’s Narrative Therapy
  Constance T. Fischer, Duquesne University, Pittsburgh, PA

Teaching New Clinicians How to Apply Theory to Test Results
  Caroline A. Purves, Westcoast Children’s Clinic, Berkeley, CA

**Paper Session J: Clinical Assessment of Children and Adolescents**

Delta Queen

Chair: John Stokes, Pace University, New York, NY

Severe Oppositional and Aggressive Behavior: Five Subtypes and Their Rorschach Correlates
  Erika Baron, Pace University, New York, NY

A New Instrument for Selection and Careers Guidance within the Armed Forces: The Wartegg Test
Alessandro Crisi, Instituto Italiano Wartegg and Universita degli Studi di Roma “La Sapienza”, Rome, Italy

Psychological Predictors of Military Pilot Training Completion: Results from a Norwegian Sample
Cato Gronnerod, University of Oslo, Oslo, Norway
Ellen Hartmann, University of Oslo, Oslo, Norway

A Three-Pronged Approach to Emotional Intelligence
Nancy E. O’Connor Smith, Employer Consultancy, Inc., Flemington, NJ
Melissa Gonzalez, Employer Consultancy, Inc., Flemington, NJ

3:30 pm – 5:30 pm Scientific Sessions (5)

Symposium L: Assessing Perceptual Accuracy on the Rorschach Using Form Accuracy Ratings Versus Form Quality Scores (2 CE Credits)
Julia
Chair: Gregory J. Meyer, University of Toledo, Toledo, OH

Overview of the Form Accuracy Rating Project And General Findings
Gregory J. Meyer, University of Toledo, Toledo, OH
Donald J. Viglione, CSPP, Alliant International University, San Diego, CA

The Validity of the Rorschach Human Representational Variable Using Form Accuracy
Sandra L. Horn, University of Toledo, Toledo, OH
The Validity of Rorschach Perceptual Thinking Index and Ego Impairment Index-2 Using Form Accuracy
G. Tanya Ozbey, University of Toledo, Toledo, OH
Gregory J. Meyer, University of Toledo, Toledo, OH
Donald J. Viglione, CSPP, Alliant International University, San Diego, CA
Kristin Dean, University of Tennessee, Knoxville, TN
Sandra L. Horn, University of Toledo, Toledo, OH

Differentiating Psychiatric Severity Using Form Accuracy and Form Quality
Katrina Ptucha, CSPP, Alliant International University, San Diego, CA
Christina Saltman, CSPP, Alliant International University, San Diego, CA
Kirstin Filizetti, CSPP, Alliant International University, San Diego, CA
Donald J. Viglione, CSPP, Alliant International University, San Diego, CA
Gregory J. Meyer, University of Toledo, Toledo, OH

Implications and Future Directions
Donald J. Viglione, CSPP, Alliant International University, San Diego, CA
Gregory J. Meyer, University of Toledo, Toledo, OH

Symposium M: The Interface of Clinical and Research Methods in Collaborative Therapeutic Neuropsychological Assessment (2 CE Credits) New Levee
Chair: Diane H. Engelman, Center for Collaborative Psychology and Psychiatry, Sonoma, CA

Introduction
Diane H. Engelman, Center for Collaborative Psychology and Psychiatry, Sonoma, CA

Therapeutic Neuropsychological Assessment: Bridging the Art and Science of Neuropsychological Assessment
Tad T. Gorske, University of Pittsburgh School of Medicine, Pittsburgh, PA

Back from Iraq: A Collaborative Approach to Assessment and Treatment of OIF/OEF Military Personnel
Cynthia Boyd, Defense and Veterans Brain Injury Center, San Diego, CA
Collaborative Neuropsychological Assessment: Examining Research and Clinical Application

Steven R. Smith, University of California, Santa Barbara, CA
Lisa A. Nowinski, University of California, Santa Barbara, CA
Aaron Estrada, University of California, Santa Barbara, CA
Katrina Schnoebelen, University of California, Santa Barbara, CA

Brain-based Behavior in Neuropsychological Assessment:
Collaborative Process and Therapeutic Intervention

Diane H. Engelman, Center for Collaborative Psychology and Psychiatry, Sonoma, CA
J. B. Allyn, Center for Collaborative Psychology and Psychiatry, Sonoma, CA

Discussant: Leonard Handler, University of Tennessee, Knoxville, TN

Integrated Paper Session N: Play Assessment and Positive Psychology

Chair: Sandra W. Russ, Case Western Reserve University, Cleveland, OH

Play Assessment and Adaptive Functioning in Children
Sandra W. Russ, Case Western Reserve University, Cleveland, OH

Relationships Between Play Ability and Openness to Experience
Tori S. Cordiano, Case Western Reserve University, Cleveland, OH
Sandra W. Russ, Case Western Reserve University, Cleveland, OH

Relationships Between Play Ability and Problem-Solving in Preschoolers
Beth Pearson, Case Western Reserve University, Cleveland, OH
Tori S. Cordiano, Case Western Reserve University, Cleveland, OH
Sandra W. Russ, Case Western Reserve University, Cleveland, OH

The Relationship Between Interpersonal Themes in Play and Prosocial Moral Reasoning
Sarah A. Cain Spannagel, Case Western Reserve University, Cleveland, OH
Sandra W. Russ, Case Western Reserve University, Cleveland, OH
Larissa Niec, Central Michigan University, Mount Pleasant, MI

Discussant: Deborah Tharinger, University of Texas, Austin, TX

Symposium Q: Developing a Test for the 21st Century:
The Emotional Attachment System (2 CE Credits)
Overview of the Emotional Attachment System
   James P. Choca, Roosevelt University, Chicago, IL

Computer Adaptive Testing with Personality Tests
   Paul Williams, Harcourt Assessments, San Antonio, TX

Categorical and Dimensional Aspects of the Personality:
   The Structure of the Emotional Attachment System
   Stephen N. Strack, VA Healthcare System, Los Angeles, CA

Clinical Case, the Emotional Attachment System in Practice
   Edward Rossini, Roosevelt University, Chicago, IL

**Paper Session P: MMPI-2 and RC-RF Research**

Chair: Martin Sellbom, Kent State University, Kent, OH

The Utility of the MMPI-2 RF ( Restructured Form) Validity Scales in Detecting Non-Credible Somatic Responding
   Martin Sellbom, Kent State University, Kent, OH
   Dustin B. Wygant, Summit Psychological Associates, Stow, OH
   R. Michael Bagby, Centre for Addiction and Mental Health, Toronto, ON, Canada

Do Elevated MMPI-2 RC Scales Underestimate Psychopathology within the Context of a Defensive Response Set?
   Paul A. Arbisi, Minneapolis VA Medical Center and the University of Minnesota, Edina, MN
   Martin Sellbom, Kent State University, Kent, OH

MMPI-2 Core Clinical Concepts: The Relationship of Clinical Scales and RC Scales to Therapist Ratings
   Jacob A. Finn, University of Tulsa, Tulsa, OK
   John L. McNulty, University of Tulsa, Tulsa, OK
   Allan R. Harkness, University of Tulsa, Tulsa, OK
   Yossef S. Ben-Porath, Kent State University, Kent, OH
   John R. Graham, Kent State University, Kent, OH

Psychometric Properties of the MMPI-2 Restructured Form (MMPI-2-RF) with Mental Health Inpatients
   Richard W. Handel, Eastern Virginia Medical School, Norfolk, VA
   Johnathan D. Forbey, Ball State University, Muncie, IN
   Robert P. Archer, Eastern Virginia Medical School, Norfolk, VA

Correlates of the MMPI-2 Restructured Form (MMPI-2-RF)
   In a College Setting
6:00 pm – 7:30 pm  Reception
Silent Auction Announcements  Atrium Foyer

6:00 pm – 7:30 pm  Awards  Atrium Foyer

**Samuel J. and Anne G. Beck Award**

**Presenter**
Ginger C. Calloway  
*Awards Chair and Rep-at-Large*  
*SPA Board of Trustees*

**Recipient**
Leonard J. Simms, Ph.D.  
*State University of New York*  
*Buffalo, NY*

**Walter G. Klopfer Award**

**Presenter**
Gregory J. Meyer, Editor  
*The Journal of Personality Assessment*

**Recipients**
Lewis R. Goldberg, Ph.D.  
*Oregon Research Institute*  
*Salem, OR*

Rick Grucza, Ph.D.  
*Washington University*  
*School of Medicine*  
*St. Louis, MO*

**Article**
“The comparative validity of 11 modern personality inventories: Predictions of behavioral acts, informant reports, and clinical indicators”  
*(JPA, Volume 89, #2)*

**Martin Mayman Award**

**Presenter**
Gregory J. Meyer, Editor  
*The Journal of Personality Assessment*

**Recipients**
Steven K. Huprich, Ph.D.  
*Eastern Michigan University*  
*Ypsilanti, MI*
Robert F. Bornstein, Ph.D.  
Adelphi University  
Garden City, NY

Article

“Well, an overview of issues related to the categorical and dimensional models of personality disorder assessment” (JPA, Volume 89, #1)

Mary S. Cerney Award

Presenter
Ginger C. Calloway,  
Awards Chair and Rep-at-Large  
SPA Board of Trustees

Recipients
Gudrun Opitz, Ph.D.  
New York-Presbyterian Hospital  
White Plains, NY  
Krisanne Bursik  
Suffolk University  
Boston, MA

Paper

“Cross-Method discrepancy of the Rorschach and MMPI-2: Associations with ego development in an inpatient setting”

7:00 pm – 9:00 pm  Student/Post-Doc Training Workshop  
Julia

A General Approach to Writing the Test Report and Integrating Test Data with the Rorschach  
Donald J. Viglione

Saturday, March 29, 2008

7:30 am – 8:00 am  Exchange Editorial Board Meeting and Breakfast  
Jed A. Yalof, Editor  
SPA Exchange newsletter  
Wolfe’s

8:00 am – 12 noon  Exhibits Open  
Atrium Foyer

8:00 am – 10:00 am  Scientific Sessions (5)

Symposium A: Telling the Story of a Collaborative Personality Assessment (2 CE credits)  
Julia

Chair: Diane H. Engelman, Center for Collaborative Psychology and Psychiatry, Sonoma, CA

Introduction: Telling the Story
Diane H. Engelman, Center for Collaborative Psychology and Psychiatry, Sonoma, CA

Use of the Fantasy Animal Drawing and Storytelling Technique in Therapeutic Communication with Children
Leonard Handler, University of Tennessee, Knoxville, TN

Telling the Story to the Child: Fable Construction and Case Example
Deborah Tharinger, University of Texas, Austin, TX

An Assessment Report in the Form of a Narrative of the Sessions: “And then we . . .”
Constance T. Fischer, Duquesne University, Pittsburgh, PA

Fantasy Animal Drawings in the Collaborative Assessment of Hospitalized Adolescents
Heikki Toivakka, Tampere University Hospital, Pitkaniemi, Finland

Perspectives on Story: A Letter and Therapeutic Story as Intervention with a Suicidal Adult
Diane H. Engelman, Center for Collaborative Psychology and Psychiatry, Sonoma, CA
J.B. Allyn, Center for Collaborative Psychology and Psychiatry, Sonoma, CA

Symposium B: Disorganized Attachment in Young Children: Manifestations, Etiology, and Implications for Child Custody (2 CE Credits) New Levee
Chair: S. Margaret Lee, Mill Valley, CA

Clinical Examples, Evaluation Procedures, and Recommendations to the Court
S. Margaret Lee, Mill Valley, CA

Theory, Etiology, and Risk Factors
Robert Kaufman, Oakland, CA

Discussant: Carol George, Mills College, Oakland, CA

Symposium C: Psychoanalytic Theory and the Rorschach Method: Research and Clinical Studies (2 CE Credits) Fulton
Chair: Marshall L. Silverstein, Long Island University, Roslyn, NY

Nomothetic Psychoanalysis: Implications for Rorschach Assessment and Research
Robert F. Bornstein, Adelphi University, Garden City, NY

Prediction of Therapists’ Reports of Change: Implicit and Explicit Measures of Personality Dynamics
Lily Rothschild, University of Haifa and Sheba Medical Center, Tel-Aviv, Israel
Cognitive and Perceptual Processes and Rorschach CS Variables

Marshall L. Silverstein, Long Island University, Roslyn, NY

Coutertransference in the Assessment of Parental Fitness: The Assessor’s Dilemmas and Difficulties

Ruth Sitton, Ben Gurion University of the Negev, Beer-Sheva, Israel

Paper Session D: Perceptual and Cognitive Aspects of the Rorschach Task

Chair: Steven R. Smith, University of California, Santa Barbara, CA

Examining the Perceptual Experience of the Rorschach Task

Steven R. Smith, University of California, Santa Barbara, CA
Ilyssa Silverman, University of California, Santa Barbara, CA
Mark A. Blais, Massachusetts General Hospital Harvard Medical School, Boston, MA

Neuropsychological Correlates of Personality Assessment Thought Disorder Scales

Lisa A. Nowinski, University of California, Santa Barbara, CA
Sara J. Walker, University of California, Santa Barbara, CA
Rene Staskal, University of California, Santa Barbara, CA
Steven R. Smith, University of California, Santa Barbara, CA

Impact of Card Rotation and Orientation Preference on the Frequency of Rorschach Reflection Responses

Sandra L. Horn, University of Toledo, Toledo, OH
Gregory J. Meyer, University of Toledo, Toledo, OH
Joni L. Mihura, University of Toledo, Toledo, OH

Some Similitudes Between the Evocative Character of the Wartegg’s Panels and the Rorschach’s Plates

Alessandro Crisi, Instituto Italiano Wartegg, Roma, Italy

Positive Malingering on the Rorschach

Trae W. Gilbert, University of Texas, Austin, TX

Paper Session E: Assessment of Youthful Offenders

Chair: Robert P. Archer, Eastern Virginia Medical, Norfolk, VA

Social Competence Abilities in Adjudicated Adolescents
Kristi L. DiGioia, University of Detroit Mercy, Detroit, MI
Margaret Stack, University of Detroit Mercy, Detroit, MI

Early Deviance: A Rorschach Investigation of Familial and Nonfamilial Juvenile Sex Offenders
Kent W. Franks, Forest Institute of Professional Psychology, Springfield, MO
Jennifer L. Anderson, Forest Institute of Professional Psychology, Springfield, MO

Robert S. White, Portage County Juvenile Court, OH

Validity of the Massachusetts Youth Screening Instrument-2 (MAYSI-2) Scales in a Correctional Setting
Elise C. Simonds, Virginia Consortium Program in Clinical Psychology, Norfolk, VA
Robert P. Archer, Eastern Virginia Medical, Norfolk, VA
David R. Spiegel, Eastern Virginia Medical, Norfolk, VA
Richard W. Handel, Eastern Virginia Medical, Norfolk, VA

10:15 am – 12:15 pm   Scientific Sessions (5)

Roundtable Discussion F: Child Custody Evaluations: Is the Use of Psychological Testing Being Threatened? (2 CE Credits)
Chair: Megan Lehmer, San Francisco, CA

Alex B. Caldwell, Caldwell Report, Culver City, CA
Robert E. Erard, Psychological Institutes of Michigan, Franklin Village, MI
Nancy Olesen, San Rafael, CA
Symposium G: The Wartegg Test (2 CE Credits)  New Levee
Chair: Alessandro Crisi, Istituto Italiani Wartegg, Roma, Italy

Case Discussion H: Personality Assessment in Police Psychology (2 CE Credits)  Fulton
Chair: Peter A. Weiss, University of Hartford, Hartford, CT

Self-Report Assessment in Policy Psychology: the MMPI-2 and New Developments
Peter A. Weiss, University of Hartford, Hartford, CT

Exploring the Reliability and Validity of the Rorschach in Police Pre-Employment Psychological Evaluations
Phillip W. Wickline, University of Virginia, Charlottesville, VA
JoAnne Brewster, James Madison University, Harrisonburg, VA
Michael Stoloff, James Madison University, Harrisonburg, VA

Effect Sizes in Personality Assessment Research in Police Psychology
John H. Hitchcock, Caliber (an ICF International Company), Fairfax, VA
Peter A. Weiss, University of Hartford, Hartford, CT

Conditional Second Opinion Psychological Evaluations of Law Enforcement Candidates
Ali Khadivi, Bronx-Lebanon Hospital Center, Bronx, NY

The Politics of Personality Assessment in Police Agencies: When Theory, Research, and Practice Collide with Cop Managers in the Selection Process
James S. Herndon, IGO Metrics, Longwood, FL

Symposium I: Jerry Wiggins’ Legacy: Advances in the Circumplex Approach to Personality Assessment (2 CE Credits)  MS Queen
Chair: Aaron L. Pincus, The Pennsylvania State University, University Park, PA

Advances in the Circumplex Approach to Personality Assessment: Introduction to the Panel
Aaron L. Pincus, The Pennsylvania State University, University Park, PA

Interpersonal Spin
Debbie S. Moscowitz, McGill University, Montreal, Quebec, Canada
David C. Zuroff, McGill University, Montreal, Quebec, Canada
Stephane Cote, University of Toronto, Quebec, Canada
Borderline Personality from an Interpersonal Perspective
Christopher J. Hopwood, Massachusetts General Hospital and Harvard Medical School, Boston, MA

Integrating Methods to Optimize Circumplex Description and Comparison of Groups
Aidan G. C. Wright, The Pennsylvania State University, University Park, PA
Aaron L. Pincus, The Pennsylvania State University, University Park, PA
David E. Conroy, The Pennsylvania State University, University Park, PA
Mark J. Hilsenroth, The Derner Institute of Advanced Psychological Studies, Adelphi University, Garden City, NY

Millon’s Circular Model of Personality Disorders
Stephen N. Strack, US Department of Veterans Affairs, Los Angeles, CA

Discussant: Leslie C. Morey, Texas A & M University, College Station, TX

Paper Session J: Personality Assessment in Health and Medical Settings
Delta Queen
Chair: Piero Porcelli, IRCCS De Bellis Hospital, Castellana Grotte, Bari, Italy

Rorschach Predictors of Bio-Psychological Distress in Medical Patients
Piero Porcelli, IRCCS De Bellis Hospital, Castellana Grotte, Bari, Italy

MMPI-2 Patterns in Bariatric Surgery Patients: A Replication and Extension of Previous Research
M. Scott Young, University of South Florida, Tampa, FL
Bill Kinder, University of South Florida, Tampa, FL
Steven Walfish, Atlanta, GA

Rorschach CS and Anorexia
Silvia Salcuni, Universita di Padova, Padova, Italy
Cristina Marogna, Universita di Padova, Padova, Italy
Alessandro Raudino, Universita di Padova, Padova, Italy

12:15 pm – 1:30 pm Lunch Break
12:15 pm – 1:30 pm Student Lunch
(Students must sign-up; lunch provided)
A Systematic Case Study of Psychoanalytic Therapy for Avoidant Personality Disorder and Specific Phobia

John H. Porcerelli, Ph.D.
Wayne State University School of Medicine, Detroit, MI

12:15 pm – 1:30 pm Interest Groups

School Psychology
Discussants: Tammy L. Hughes, Hedwig Teglasi

Neuropsychology
Discussants: Mark A. Blais, Steven R. Smith

Forensic Psychology
Discussants: Marvin A. Acklin, Nancy Kaser-Boyd

Health Psychology
Discussant: Paul Arbisi

Collaborative/Therapeutic Assessment
Discussants: Constance T. Fischer, Stephen E. Finn

12:15 pm – 1:30 pm International Members Meeting
Chairs: Jane E. Sachs and Bruce L. Smith, SPA Board of Trustees

1:30 pm – 3:30 pm Scientific Sessions (5)

Case Discussion K: Case Using Local Norms and the International Adult Composite Norms to Assess an Adult Male
(2 CE Credits)
Chair: Thomas W. Shaffer, Fresno, CA

Roundtable Discussion L: Innovative Teaching of Personality Assessment (2 CE Credits)
Chair: Leonard Handler, University of Tennessee, Knoxville, TN

Teaching an Advanced Course in Personality Assessment
Leonard Handler, University of Tennessee, Knoxville, TN

Unearthing and Refining Preexisting Assessment Skills
Herbert Potash, Madison, NJ

Crossing Generations in Teaching Personality Assessment
Anthony Tasso, Fairleigh Dickinson University, Florham Park, NJ

45
Wishful Assessment Teaching  
Jed A. Yalof, Immaculata University,  
Immaculata, PA

Paper Session M: Current Research on Self-Report Measures  
Chair: Leslie C. Morey, Texas A & M University,  
College Station, TX

Investigating Gender Moderation Effects on the MMPI-2  
Jude M. Chamberlain, Kent State University,  
Kent, OH  
Martin Sellbom, Kent State University,  
Kent, OH

Parental and Self-Representations and Interpersonal Adjustment

Mark R. Lukowitsky, The Pennsylvania State University, University Park, PA
Aaron L. Pincus, The Pennsylvania State University, University Park, PA
Richard Carlson, The Pennsylvania State University, University Park, PA

Linking Normal Personality Variation to Dysfunctional Interpersonal Schemata

Jan H. Kamphuis, Universiteit van Amsterdam, Amsterdam, The Netherlands

Paper Session O: Forensic Assessment

A MMPI-2 and MCMI-III Based Cluster Analysis Among Child Custody Litigants

Kyle J. Goodwin, Florida Institute of Technology, Melbourne, FL
Radhika Krishnamurthy, Florida Institute of Technology, Melbourne, FL
Deborah O. Day, Orlando, FL

The Acceptability and Use of Psychological Tests in Child Custody

Stephen J. Lally, Argosy University, Washington, DC
Robert H. Gordon, St. Louis Behavioral Medicine Institute, St. Louis, MO

Rorschach Descriptive Statistics for Sexually Violent Predators

Robert B. Duthie, Special Commitment Center, Steilacoom, WA
Megan Carter, Special Commitment Center, Steilacoom, WA
Utility of MMPI-2 Megargee and Clinical Scales in Explaining Short- and Long-Term Criminality

Danielle L. Burchett, Kent State University
Kent, OH
Wendy R. Dragon, Kent State University
Kent, OH
John R. Graham, Kent State University
Kent, OH
Martin Sellbom, Kent State University
Kent, OH

3:45 pm – 5:45 pm Scientific Sessions (5)

Symposium P: Integrating Attachment in Adolescent Assessment and Clinical Cases (2 CE credits)
Chair: Carol George, Mills College, Oakland, CA

Assessing Attachment in Adolescence: Using the Adult Attachment Projective with Teens
Carol George, Mills College, Oakland, CA
Adriana Lis, University of Padova, Padova, Italy

Attachment and AAP Assessment in a Normative Sample of Italian Adolescents
Adriana Lis, University of Padova, Padova, Italy
Daniela Di Riso, University of Lecce, Lecce, Italy
Claudia Mazzeschi, University of Perugia, Perugia, Italy

Defensive Processes of Attachment and Behavior Ratings in Maltreated Adolescents
Linda Webster, University of the Pacific, Stockton, CA

The AAP and Rorschach CS in Anorexic Adolescents: A Cultural Case Analysis
Daniela Di Riso, University of Lecce, Lecce, Italy
Loredana Leghezza, University of Perugia, Perugia, Italy
Dafine Chessa, University of Padua, Padua, Italy

Integrating Attachment Information to Personality Assessment with Adolescents: A Case Illustration
David Joubert, Napa State Hospital, Napa, CA

How does Attachment Assessment Contribute to Our Clinical Work with Adolescents?
Adriana Lis, University of Padova, Padova, Italy

Symposium Q: Cognitive and Affective Constructions of Treatment Resistant Patients: What Can Westen’s SCORS Method Tell Us About Our Patients? (2 CE Credits)
New Levee
Chair: A. Jill Clemence, The Austen Riggs Center, Stockbridge, MA

Patients at Risk: Predicting Remission from Suicidal Ideation Using the SCORS
   A. Jill Clemence, The Austen Riggs Center, Stockbridge, MA

Objects Across Contexts: Utilizing SCORS to Detect Differential Object Representations in Work, Intimate, and Therapy Narratives on the RAP
   Spencer Biel, The Austen Riggs Center, Stockbridge, MA

TAT vs. RAP: Assessing Object Relations Across Stimuli
   Adrian Bailey, The Austen Riggs Center, Stockbridge, MA

Real Time: Clinical Utility of SCORS Ratings and a TAT as Applied to a Clinical Case
   Christina Coulombe, The Austen Riggs Center, Stockbridge, MA

Discussant: John H. Porcerelli, Wayne State University Medical School, Detroit, MI

Paper Session R: Collaborative Assessment Fulton
Chair: Virginia M. Brabender, Widener University, Chester, PA

Collaborative Assessment: Comparison Between Experimental and Control Case
   Adriana Lis, University of Padova, Padova, Italy
   Silvia Salcuni, University of Padova, Padova, Italy
   Claudia Mazzeschi, University of Perugia, Perugia, Italy
   Vincenzo Calvo, University of Padova, Padova, Italy

Toward Experience-Near Assessment Feedback: Making Meaning of Rorschach Data
   Matthew J. Del Giudice, Widener University, Chester, PA
   David J. York, Christiana Care Hospital, Wilmington, DE
   Alan L. Schwartz, Christiana Care Hospital, Wilmington, DE

Do You Tell the Client the Truth? Rorschach Feedback to Help Borderlines Understand They are Borderline
   Noriko Nakamura, Nakamura Psychotherapy Institute, Tokyo, Japan

Promoting Personal and Professional Development in Training Psychologists: Providing Feedback and Consultation with the Widener Emotional Learning Survey (WELS)
Assessing the Positive in Interpersonal Relationships: Further Validation of the Inventory of Interpersonal Strengths

Daniel T. Rogers, Kennesaw State University, Kennesaw, GA
Robert L. Hatcher, University of Michigan, Ann Arbor, MI

Paper Session S: Studying Abnormal States with the Rorschach (2 CE Credits)

Chair: Radhika Krishnamurthy, Florida Institute of Technology, Melbourne, FL

A Rorschach Profile of Munchausen by Proxy: Preliminary Findings

Radhika Krishnamurthy, Florida Institute of Technology, Melbourne, FL
Kyle J. Goodwin, Florida Institute of Technology, Melbourne, FL
Deborah O. May, Orlando, FL
Robert Janner, Orlando, FL

Depression and Vulnerability: A Follow-up with SCID, Rorschach, and BDI

Ellen Hartmann, University of Oslo, Oslo, Norway

Rorschach Correlates of Anomalous Experiences: A Study of Thought and Dissociation

Giuseppe Scimeca, University of Palermo, Italy
Giorgia Greco, University of Palermo, Italy
Antonella Bonadonna, University of Palermo, Italy
Stefano Boca, University of Palermo, Italy

Rorschach CS Constellations in Dissociative States

Ruth Zeligman, Adelphi University, Brooklyn, NY

Paper Session T: Assessing Suicide Risk

Chair: J. Christopher Fowler, The Erik Erikson Institute, The Austen Riggs Center, Stockbridge, MA

The Rorschach and Medically Serious Suicide Attempts: The Riggs Index

J. Christopher Fowler, The Erik Erikson Institute, The Austen Riggs Center, Stockbridge, MA

The Rorschach Suicide Constellation and Medically Serious Attempts
Michael Groat, The Erik Erikson Institute, The Austen Riggs Center, Stockbridge, MA

Evaluation of the Reliability and Validity of Two Clinician-Judgment Suicide Risk Assessment Instruments
Prachi Kene, University of Toledo, Toledo, OH
Dr. Joseph D. Hovey, University of Toledo, Toledo, OH

Utility of Personality Assessment Inventory in Assessing Suicide Risk
Prachi Kene, University of Toledo, Toledo, OH
Dr. Joseph D. Hovey, University of Toledo, Toledo, OH

6:00 pm – 7:00 pm  Farewell Reception and Reception for Journal Reviewers  Atrium Foyer

6:00 pm – 7:00 pm  Poster Session II  Atrium Foyer
Chair: Robert E. Erard
Program Chair and President-elect SPA Board of Trustees

Does Alexithymia Mediate the Relationship Between Sexual Sensation Seeking and High-Risk Sexual Behavior?
Joshua S. Scott, Long Island University, Brooklyn, NY

Does the WUSCT Measure the Interpersonal Domain?
Rebecca DeMoor, Texas A & M University, College Station, TX

Delta Queen  

**Marriott Meeting Room Floor Plans**
The Society is dedicated to the development of methods of personality assessment, the advancement of research on their effectiveness, and the exchange of ideas about the theory and practice of assessment.

Bruno Klopfer and a group of his students founded the Society for Personality Assessment (SPA) in Essex County, New Jersey. The Society is a collegial organization dedicated to the advancement of professional personality assessment, to the development of procedures and concepts for personality assessment and to the ethical and responsible use of these techniques.

Initially incorporated as the Rorschach Institute, Inc., in 1938, the organization was renamed the Society for Personality Assessment in 1971 to reflect the Society's interest in the entire spectrum of issues present in contemporary personality assessment and to focus the Society as a special interest group, concerned with promoting the exchange of ideas and information about personality assessment in research and practice.

The Society organizes and conducts an Annual Meeting as partial fulfillment of the incorporator's objective "to provide an annual assembly of sharing research findings and clinical experiences". In addition, the Society publishes the Journal of Personality Assessment and a newsletter, the SPA Exchange. Six Awards are presented by the Society:

The BRUNO KLOPFER MEMORIAL AWARD is given for outstanding, long-term professional contribution to the field of personality assessment. The recipient gives an acceptance presentation.

The SAMUEL J. and ANNE G. BECK AWARD is given for outstanding early career research in the field of personality assessment. The award is presented in conjunction with the University of Chicago. The recipient gives an acceptance presentation.

The WALTER G. KLOPFER AWARD is bestowed annually by the Society for Personality Assessment for distinguished contribution to the literature in personality assessment. Eligible contributions focus on statistically based research projects. The Journal for Personality Assessment Editor selects a panel of Consulting Editors to nominate outstanding articles from the previous year, each of which is then rated by the Editor and Associate Editors. In the event of a tie, two awards may be given.

The MARTIN MAYMAN AWARD is bestowed annually by the Society for Personality Assessment for a distinguished contribution to the literature in personality assessment. Eligible contributions may consist of an outstanding case study, qualitative research project, or theoretical development. The JPA Editor selects a panel of Consulting Editors to nominate outstanding articles from the previous year, each of which is then rated by the Editor and Associate Editors. In the event of a tie, two awards may be given.

The MARGUERITE R. HERTZ MEMORIAL is a tribute to Dr. Hertz for her long-term professional contributions to personality assessment. The memorial is presented by a distinguished member of the Society in honor of a deceased eminence from the field of personality assessment. At times, the presenter also invites other members to join in relating anecdotes of their personal contact with the honoree.

The MARY S. CERNEY STUDENT AWARD is awarded to the best personality assessment research paper submitted by a student. This award carries a small stipend to help defray the cost of attending the Annual Meeting.
2008 Bruno Klopfner Award
Leonard Handler, Ph.D.
University of Tennessee
Knoxville, TN

2008 Samuel J. and Anne G. Beck Award
Leonard J. Simms, Ph.D.
State University of New York
Buffalo, NY

2008 Marguerite R. Hertz Memorial Award
In memory of Jerry S. Wiggins, Ph.D.
Presented by Stephen N. Strack, Aaron L. Pincus,
David S. Nichols, and Krista Trobst

2008 Mary Cerney Student Award
Gudrin Opitz, Ph.D.
New York Presbyterian Hospital
White Plains, NY

2007 Walter G. Klopfner Award
Lewis R. Goldberg, Ph.D.
Oregon Research Institute
Eugene, OR
Rick Grucza, Ph.D.
Washington University School of Medicine
St. Louis, MO

2007 Martin Mayman Award
Steven K. Huprich, Ph.D.
Eastern Michigan University
Ypsilanti, MI
Robert F. Bornstein, Ph.D.
Adelphi University
Garden City, NY
Dr. Leonard Handler was born and raised in Brooklyn, New York. He was awarded a B.A. in psychology from Brooklyn College in 1958. Soon after graduation he worked for the Welfare Department of New York City, while attending the City University M.A. program in clinical psychology, in the evenings. In 1960 he entered the doctoral program in clinical psychology, at Michigan State University and earned his Ph.D. in 1964. Soon after graduation Dr. Handler took a position as Assistant Professor in the Psychology Department, University of Tennessee (UT). He was appointed Associate Professor in 1968 and Professor in 1972. He served as Associate Director of the Clinical Training Program (1981 to 1984; 1993-2000). He was Clinic Director, from 1993 to 2000. In 1976 he spent a term on sabbatical at Tavistock Clinic, in London, England. Dr. Handler is now Professor Emeritus at UT. He taught introductory and advanced courses in assessment, among other undergraduate and graduate courses. He also organized a research lab in object relations psychology, where he and groups of students did research in the areas of assessment and psychotherapy.

Dr. Handler has co-edited two assessment books and over 100 articles and chapters, in the areas of assessment, psychotherapy, hypnosis and neuropsychology. He has done many workshops in assessment, including presentations in the Czech Republic, Finland, Israel, and Sweden. He is a Fellow of APA, through Division 12, and a Diplomate of the American Board of Assessment Psychology. He shared the Walter Klopfer Award from SPA, in 1998. From 1999 to 2000 he served APA as a member of the Committee on Psychological Tests and Assessment, and as a member of the Committee on Internet Testing, in 2000-2001. In 1999 he was awarded the Chancellor’s Senior Research and Creative Achievement Award at UT. For a number of years he served as a Member-at-Large of SPA, and as President Elect, President, and Past President. Dr. Handler serves as Co-Editor of the Clinical Case Applications section of the Journal of Personality Assessment.

Leonard Simms conducts research and publishes papers that are broadly relevant to measurement of and theory related to personality and psychopathology. More specifically, he studies applied and basic psychological assessment, dimensional models of personality and psychopathology, item response theory applications to personality measurement, and computerized adaptive testing. He is active in a number of professional societies and serves on the editorial boards for Journal of Abnormal Psychology and Assessment. Dr. Simms currently is on the faculty at the University at Buffalo, The State University of New York. He holds a BS in Psychology from California Polytechnic State University and MA and PhD degrees in Clinical Psychology from the University of Iowa.
**2008 Marguerite R. Hertz Award**  
_in memory of Jerry S. Wiggins, Ph.D._  
_Presented by Stephen N. Strack, Aaron L. Pincus, David S. Nichols, and Krista Trobst_

Jerry S. Wiggins, Ph.D., was born in Pittsburgh, PA, and received his post high school education at American University in Washington, DC (B.A., 1952), and Indiana University at Bloomington (Ph.D., 1956). As a teacher, researcher, and clinical psychologist, he held faculty positions at the University of Rochester (1956-57), Stanford University (1957-62), University of Illinois at Champaign-Urbana (1962-73), University of British Columbia (1973-96), and York University in Toronto (1999-2006). He was a Visiting Professor at the University of Hawaii (1967), University of Western Australia (1977), and Yale University (1997-98).

In a long and illustrious career, Professor Wiggins authored six books, numerous assessment instruments and scales (e.g., *Interpersonal Adjectives Scales-Revised* and *Wiggins MMPI Content Scales*), and 100 research articles, chapters, and monographs. He served in diverse advisory and consulting roles in the US, Canada, Europe, and Australia, was Editor of the *Journal of Research in Personality*, and served on the editorial board of nine other journals. For his outstanding contributions and leadership in the field of psychology he was elected Fellow of the American Psychological Association and the Society for Personality Assessment (SPA). In 1989 he was the recipient of the University of British Columbia's *Killam Research Prize*, and in 2002 was given the *Bruno Klopfer Award* by SPA for “outstanding, long-term professional contributions to the field of personality assessment.”

**2008 Mary Cerney Student Award**  
_Gudrun Opitz, Ph.D._

Gudrun M. Opitz earned her Ph.D. in Clinical Psychology from Suffolk University in 2007. She completed a pre-doctoral internship at the Columbia Presbyterian Hospital and the New York State Psychiatric Institute in New York City. Dr. Opitz then completed a postdoctoral fellowship at the New York Presbyterian Hospital, Westchester Division of the Weill Cornell Medical Center in White Plains New York. Her clinical interests include psychodynamic psychotherapy with adults and clinical assessment across the life span. She is currently working as a Licensed Psychologist for the New York State Psychiatric Institute of the Columbia University Medical Center providing psychological and neuropsychological evaluations for children, adolescents, and adults. Her research aims to understand whether a developmental perspective will help explain the discrepancy of the Rorschach and the MMPI-2. Her dissertation addressing this question and was partially funded by an SPA Dissertation Award.
Lewis R. Goldberg is a Senior Scientist at the Oregon Research Institute and an Emeritus Professor of Psychology at the University of Oregon. He has been a Fulbright Professor on two occasions, first at the University of Nijmegen in the Netherlands and later at Istanbul University in Turkey. In addition, he was a Visiting Professor at the University of California at Berkeley, and a Fellow-in-Residence at the Netherlands Institute for Advanced Study.

A past president of the Society of Multivariate Experimental Psychology and the Association for Research in Personality, he has served on both the Cognition, Emotion, & Personality and the Personality & Cognition research review committees of the National Institute of Mental Health. He was a Selection Officer for the U.S. Peace Corps, a consultant to the Intelligence Division of the U.S. Secret Service, a member of the Council of Representatives of the American Psychological Association (APA), and the Chair of the APA Task Force on Honesty and Integrity Testing. He has served on the editorial boards of the Annual Review of Psychology and over a dozen other psychological journals.

His contributions to the scientific literature in personality and psychological assessment have included articles on judgment and decision-making, the comparative validity of different strategies of test construction, the measurement of situational vs. dispositional attributions in self and peer descriptions, the characteristics of personality traits and states, and the development of taxonomies of personality-descriptive terms in diverse languages. To provide public-domain measures of the most important personality attributes, he has developed an Internet-based scientific collaboratory, the International Personality Item Pool (IPIP: http://ipip.ori.org/).

Richard Grucza, Ph.D.

Richard (Rick) Grucza is an Assistant Professor in the Department of Psychiatry at Washington University School of Medicine in St. Louis. He received his Ph. D. from the Division of Biology and Biomedical Sciences at Washington University in 2000. He completed a postdoctoral training program in biostatistics and psychiatric, under the mentorship of Dr. Robert Cloninger, and was appointed to the faculty in the Department of Psychiatry in 2003. His interest in personality as a risk factor for addiction and addictive behavior led him to several collaborations with Lew Goldberg, beginning in 2001. His research also involves the genetics and epidemiology of addiction.
2007 MARTIN MAYMAN AWARD

Steven K. Huprich Ph.D.

Dr. Steven Huprich is an Associate Professor in the Department of Psychology at Eastern Michigan University. He has published over 50 manuscripts and book chapters, with particular interest in the DSM-proposal of Depressive Personality Disorder and the conceptualization and assessment of Axis II disorders. He serves on the editorial board of the Journal of Personality Disorders, is the editor of Rorschach Assessment of the Personality Disorders (Erlbaum, 2006) and has another book in press, Psychodynamic Therapy: Conceptual and Empirical Foundations (to be released in the fall of 2008, Taylor and Francis). He is currently editing two other books and continues an active program of teaching and research. Dr. Huprich also has a private practice in Brighton and Novi, Michigan. Dr. Huprich earned his PhD from the University of North Carolina at Greensboro and completed his internship at the SUNY Upstate Medical University, Syracuse, NY.

Robert F. Bornstein, Ph.D.

Robert F. Bornstein received his PhD in Clinical Psychology from the State University of New York at Buffalo in 1986 and is Professor of Psychology at Adelphi University. Dr. Bornstein has published numerous articles and book chapters on personality dynamics, assessment, and treatment. He wrote The Dependent Personality and The Dependent Patient: A Practitioner’s Guide, co-authored (with Mary Languirand) When Someone You Love Needs Nursing Home Care and Healthy Dependency, and co-edited (with Joseph Masling) seven volumes of the Empirical Studies of Psychoanalytic Theories series, as well as Scoring the Rorschach: Seven Validated Systems. Dr. Bornstein is a Fellow of the American Psychological Association, Association for Psychological Science, and Society for Personality Assessment; his research has been funded by grants from the National Institute of Mental Health and National Science Foundation. Dr. Bornstein received the Society for Personality Assessment’s 1995, 1999, and 2002 awards for Distinguished Contributions to the Personality Assessment Literature, and received the Division 12/American Psychological Foundation 2005 Theodore Millon Award for Excellence in Personality Research.

Classes of Membership

**Member ($120)**

Persons whose work and interests lie primarily in the study or treatment of human behavior and its development or dysfunction, and who are recognized by virtue of professional training, experience, and membership in professional associations, as qualified psychologists, psychiatrists, or research workers in these fields, may be elected as Members provided their qualifications conform to the following standards: Doctorate in psychology, medicine, or related field and involved in personality assessment at a level of supervised experience acceptable to the Membership Committee. The requirement of a doctorate may be waived in the case of applicants from countries in which it is not the standard degree relevant to the practice of personality assessment if applicants have the advanced degree and training necessary for independent practice as determined by the Membership Committee.

**Fellow ($120)**

Psychologists or individuals in the behavioral sciences who have demonstrated particular competence in methods of personality assessment in two of the following ways:

1. A history of successful teaching in the area of personality assessment demonstrated by the attainment of the rank of Associate Professor or higher; or
2. Made theoretical or research contributions of high quality in the area of personality assessment; or
3. Have demonstrated professional leadership through supervision, administration or consultation in the use of methods of personality assessment within an institution or agency; or
4. Have demonstrated other high attainments such as acquisition of the ABPP diploma;
5. Have made a unique and outstanding contribution to the Society

Doctor's degree with special training in methods of personality assessment and a minimum of five years of acceptable experience following the attainment of the degree. The requirement of a doctorate may be waived in the case of applicants from countries in which it is not the standard degree relevant to the practice of personality assessment if they have a minimum of five years of acceptable experience after attaining the degree necessary for independent practice as determined by the Membership Committee.

At least one Fellow and one Member of the Society shall endorse each applicant for Fellow as to competence, personal soundness and integrity.

**Associate ($120)**

Persons who are graduate students in psychology or professionals or paraprofessionals who are working in supervised positions may be elected as Associates provided their qualifications conform to the following standards:

1. Completion of one full year of graduate study in psychology plus one year of supervised experience, or completion of two years of graduate study with at least one semester of study in a full academic university course in methods of personality assessment; or
2. Two years of experience in the particular professional or paraprofessional field of the applicant who holds at least an Associate of Arts degree.

Note: After five years, associates may apply for full membership.
Each applicant for Associate shall be endorsed as to training, personal soundness and integrity by one sponsor, who shall be a Member of the Society. Full time graduate student applicants need one clinical faculty member, or the Director of the Clinical Training Program as sponsor.

**Student Affiliate ($32)**

Graduate students enrolled in a regionally accredited program in psychology or a related field may be elected as Student Affiliates.

Applicants shall be endorsed as to their personal soundness, integrity and current status in a graduate program by at least one sponsor who is either a Member of the Society or a faculty member of the applicant's graduate program.

Graduate students may be enrolled in this membership category for a maximum of five years.

**New Doctoral Graduate and Second Year Doctoral Graduate ($60-$85)**

To ease the financial transition from Student Affiliate to Member, the Board has added two more classes of membership. New doctoral graduates pay $60 and second year doctoral graduates pay $85 as members of the Society. The third year after receipt of their doctoral degree, these members will be expected to pay the full annual dues of $120.00.

**Honorary Member**

Persons of outstanding distinction or who have done much to promote the objectives of the Society may be elected to Honorary Membership status.

**Life Member**

Persons who have reached age 65 and have been a Member/Fellow of the Society for 20 years; or have reached age 65, retired, and been a Member/Fellow of the Society for at least 10 years.

Conference Information

Registration
Participant conference registration includes all conference materials; coffee breaks; the President’s Welcoming Reception on Thursday evening, a reception on Friday night, as well as the Closing Reception on Saturday evening; entry to the scientific sessions, the master lectures, poster sessions, and the award presentations; and a collegial atmosphere to meet and interact with colleagues from around the world who are interested in personality assessment research and practice.

Cancellations will be accepted for the Annual Meeting and/or a Workshop, less a $75 administrative fee, until February 26, 2008. After that date no refunds will be granted.

Hotel Reservations
Hotel reservations must be made directly with the hotel. To get the special conference rate, please inform the hotel that you are with the Society for Personality Assessment (SPA).

Marriott New Orleans at the Convention Center
859 Convention Center Boulevard
New Orleans, LA 70130
Tel: 504-613-2888
Fax: 504-613-2890
Online Reservations:
http://marriott.com/msymc?groupCode=PERPERA&app=resvlink

Reservation deadline to receive the conference rate: March 1, 2008

Room Block Dates: March 26-30, 2008
Single Room: $158 per night
Double Room: $158 per night
Additional Person: $20 per night
Suites: $750 per night

SPA realizes that you have a number of options when securing your accommodations for the SPA Annual Meeting. We would like you to know that, in order to secure the block of rooms at a reasonable room rate, SPA has made a financial commitment to the Sheraton National Hotel. If the block is not filled, there are financial implications for SPA, and it affects our ability to negotiate room rates for future meetings.

Hotel Accommodations
Discover a New Orleans hotel that delivers a legendary experience with historic elements at the Marriott New Orleans Convention Center Hotel. Located in the Warehouse/Arts District, the hotel is across the street from the Convention Center and Port of New Orleans, as well as within walking distance to the French Quarter, Harrah’s Casino, and the city’s finest shopping and dining establishments. Housed in a former cotton mill from the mid-1800’s, this riverfront hotel in New Orleans expertly combines classic antiques and modern amenities and trendy décor. For details on the hotel, see http://www.marriott.com/hotels/travel/msymc-new-orleans-marriott-at-the-convention-center/
Dining: Wolfe’s in the Warehouse (onsite) serves three meals each day. Restaurants close by include: Tommy’s Cuisine, Emerils, Mulate’s Cajun Restaurant, Mortons Steakhouse, LaCote Brasserie, and Roch-n-Sake.

Parking: On-site parking, fee: $28 daily; valet parking, fee: $28 daily; 0-6 hours, $12; 6-12 hours, $16

Transportation: Driving directions from the Airport: take I-10 East to Downtown, exit Poydras St. Follow Poydras St. Go straight for 1 mile. Turn right on to Convention Center Boulevard. Hotel on right. The hotel is 14 miles SE of the airport, and the estimated taxi fare is $28 (one way).

Meeting Space
Meeting rooms are set to the maximum allowed by the fire codes. If there are no more chairs in the room, it means the room is at capacity, and you should choose another session to attend. Workshop rooms are set for the number of persons that have registered and paid for the workshop. Please do not participate in a workshop if you have not registered and paid. If you bring a laptop to a scientific session or a workshop, make sure it can run on a battery. Meeting rooms in most hotels are not equipped with many electrical outlets throughout the room.

Marguerite R. Hertz Memorial Lunch
The Marguerite R. Hertz Memorial is a tribute to Dr. Hertz for her long-term professional contributions to personality assessment, and is presented by the Society each year in honor of a deceased eminence from the field of personality assessment. This year’s honoree is Jerry S. Wiggins, Ph.D. (1931-2006), a man who made seminal contributions to several diverse areas of personality assessment over a career that spanned five decades. Among them, his MMPI Content Scales (1966) set the benchmark for constructing pure symptom and trait scales from the MMPI’s standard clinical measures, while his extension of Timothy Leary’s work led to the development of the Interpersonal Adjective Scales (1979; revised in 1988), the most precise and psychometrically sound measure of the Interpersonal Circle ever developed. Professor Wiggins’ early text on Personality and Prediction (1973) inspired a generation of students during a treacherous time for the field by clearly demonstrating the scientific basis of personality assessment, while his last book, Paradigms of Personality Assessment (2003), was hailed as “monumental” for its integrative review of major school of personality study and testing methodology.

Student Travel Grants
In an effort to encourage training of students and promote research and writing on personality assessment, SPA offers grants to students who are first authors on papers or posters being presented at the Annual Meeting. Awards are available for amounts up to $200 to help defray costs of travel to and from the Annual Meeting. Due to limited funds, not all applicants receive a travel grant. Also, many of the grants are small, so students should not expect full reimbursement for their travel. The guidelines and application are available on the web page at www.personality.org under the conference tab. Students will be notified as soon as possible after the application deadline whether they will receive a travel grant and in what amount. Checks will be distributed at the 2008 Annual Meeting. Please check in at the conference registration desk.

Student/Post-Doc Workshop
Donald J. Viglione will present a special training workshop, A General Approach to Writing the Test Report and Integrating Test Data with the Rorschach, for students and post doctoral graduates. See registration form. Friday, March 28, 7:00 pm
**Student Lunch**
SPA will sponsor a lunch for students to have an opportunity to interact with John H. Porcerelli of Wayne State University. See registration form. **Saturday, March 29, 12:15 pm**

**Volunteers**
As has been the tradition, SPA solicits the help of student volunteers to monitor the continuing education sessions throughout the Annual Meeting. This task is integral to the continuing education portion of the conference, and we need two volunteers per CE session. This year SPA is sponsoring 17 workshops, 20 symposia/case discussions, two Master Lectures, and one award presentation, so approximately 75 volunteers are needed. Student volunteers may attend the workshop they are monitoring at no cost; and those students who volunteer to monitor a CE scientific session or a Master Lecture held during the conference can register for the conference at a reduced rate of $45. Contact Paula J. Garber at manager@spaonline.org.

**Silent Auction**
This year we would like to “up the stakes” somewhat in the Silent Auction. We are asking members to donate “large ticket” items this year; i.e., a week and/or weekend at your vacation home; a gourmet dinner for four prepared by a member; season passes to a family theme park; theater or movie passes; art work; photography; electronics; gift certificates for hotels, stores, restaurants; jewelry, etc. *Be creative, think BIG, and give generously!* Contact SPA if you have items or services you wish to donate to the Silent Auction, which benefits the Student Travel Grants. Winners will be announced during the reception on Friday evening. **Friday, March 28, 6:00 pm**

**Open Consultation Sessions**
Meet with David S. Nichols and Marshall L. Silverstein in an informal context to “pick their brains.” **Thursday, March 27, 1:00-2:00 pm**

**Writing Cases and Clinical Topics for Publication in JPA**
Have a fascinating case you’ve often thought about writing up and publishing? An innovative approach to assessment training? A thorny ethical problem with a creative solution? A new way of understanding an old personality construct? *JPA* isn’t just for experimenters who like to integrate ROC curves and run confirmatory factor analyses with oblique rotations. It’s also for people like you! Come and find out how to turn your professional experience into an effective journal article. Gregory J. Meyer (Editor, JPA); Robert E. Erard (CCA Section Co-editor); Leonard Handler (CCA Section Co-editor); and Jed A. Yalof (CCA Contributing Author) **Thursday, March 27, 1:00-2:00 pm**

**Research Consultation**
Meet and interact with Mark A. Blais for an update on the Utility of Assessment Research project. **Thursday, March 27, 1:00-2:00 pm**
Book Signing
Once again we will be promoting a book signing during the Thursday evening reception. SPA members attending the conference who have had a book published recently are invited to participate. This is an opportunity for our SPA community to become more familiar with your work. You are asked to sit at a table with your books and be available for conversation. You will be responsible for all financial transactions. **We ask you to donate one book to the Silent Auction.** Please contact Paula J. Garber at manager@spaonline.org if you are interested in participating. **Thursday, March 27, 6:00 pm**

SPA International Committee
The International Committee is pleased to report that it is launching a number of new initiatives to promote more exchange with our members from countries outside the US. We invite our international members to join us at a meeting at the 2008 Annual Meeting on March 29, from 12:15 pm to 1:30 pm. At this meeting, we hope to hear your comments about the ideas we have developed so far and to draw upon your expertise, interests, and perspectives on personality assessment to develop others. Among the ideas suggested so far is a survey of research interests to facilitate integration of your research into symposia and other presentations. Also under consideration is a solicitation for articles for the Exchange newsletter concerning cross-cultural issues, the manner in which assessment is performed in your countries, assessment instruments peculiar to your countries, and other topics of interest. Another suggestion concerns how to facilitate your bringing your students to SPA meetings and workshops. We would also like to recruit your assistance in preparing a symposium on torture victims around the world. Please join us on the 29th!

An SPA Initiative: Interesting You in Interest Groups
SPA members have expressed an interest in having an opportunity to interact with other members who are engaged in personality assessment in similar venues. Last year, we had a wonderful presentation on school psychologist applications of personality assessment and the attendees indicated that they would like more opportunity to engage with other assessors who provide services in school.

To accommodate this member request, the annual meeting will see the launching of interest groups. On Saturday, March 29, 12:15 – 1:30 pm, individuals who are involved in school, forensic, health, collaborative/therapeutic, and neuropsychological areas will each have their own table(s) for lunching and conversing (box lunches will be made available for purchase). During that session, participants can consider whether an interest group should be established in that area and what the needs and contributions of the group might be. For example, assessors working in health psychology setting might consider whether a greater array of health psychology/personality assessment topics should be featured during the annual meeting and whether the interest group might make a contribution to this need by submitting proposals in this area. From this lunch session, the SPA Board hopes to obtain information and recommendations that will inform planning for future SPA activities. The participants will have the opportunity to exchange e-mail addresses from which list-serves may be created and enable conversation throughout the year.

Discover New Orleans, LA
For information on New Orleans visit: [www.neworleanscvb.com](http://www.neworleanscvb.com). New Orleans has a subtropical climate with pleasant year-round temperatures. Temperatures range from the mid 40’s in winter to more than the 90’s in the summer. Rainfall is common in New Orleans, with a monthly average of about five inches of precipitation. In March temperatures range from a high of 72 degrees to a low of 52 degrees.
